

COMMISSIONS

Several of our recent large commissions have been public art projects. For The City of Los Angeles, CA, we are currently involved on two public facilities: a 13-panel, 26' mural for a new library, as well as a three-sided, 24 panel mural for the new Studio City Fire Station. At The City of La Quinta, CA City Hall, a deep etched, painted glass work for their city council chambers is winning great acclaim.

Among other current commissions are private residences in CA, PA, IL and NJ, as well as a temple in Ontario, Canada, and a penthouse suite aboard The World of Sea, a cruise ship w/private condominiums. A key project of ours is a Frank Lloyd Wright inspired home in Southern California. We were pleased to be selected for this major commission from a national call for entries, and look forward to its publication in a major international magazine.

In the Bahamas, we have been commissioned to do 9 individual resort "domiciles", as well as the 45,000 square-foot clubhouse of a new planned community. We were chosen based on our previous work at Del Lagos, a resort on the Western Coast of Mexico.
